SUMMARY

Flutter developer with hands-on production experience building cross-platform (iOS, Android, Web) apps — from real-time speech recognition and native audio-session debugging to animation-driven UX for young users. Comfortable across the full Flutter stack, including Rive for interactive vector animation.

TECHNICAL SKILLS

Languages: Dart, JavaScript, Python, SQL

Flutter Ecosystem: speech_to_text, soundpool, permission_handler, Lottie, dotlottie, google_fonts, carousel_slider

Animation & Design: Lottie, Rive, Figma-to-Flutter implementation, pixel-perfect responsive UI

APIs & Architecture: REST, GraphQL, modular/data-driven app architecture, clean architecture

Tools: Git/GitHub, VS Code, Android Studio, Agile/Scrum

EXPERIENCE

Coreillustrio

Jun 2025 - Aug 2026

Flutter Developer

Chennai, India

- Shipped a cross-platform (iOS, Android, Web) Flutter phonics-learning app for early-childhood users, owning feature development across a modular, data-driven screen and widget architecture.
- Built a real-time speech-recognition feature (speech_to_text) with a custom lenient-matching engine — syllable, phonetic, and partial-word comparisons — so young children get accurate feedback despite imperfect pronunciation.
- Root-caused and fixed a native iOS bug where speech recognition and audio playback (soundpool) conflicted over the AVAudioSession, causing audio stutter; redesigned the interaction into a sequential play-then-listen state machine, with runtime mic/audio permissions handled via permission_handler.
- Designed an animated feedback system (Lottie/dotlottie) built around a multi-emotion mascot that reacts to a child's performance, and iterated the accuracy-scoring UI based on user testing to make modules friendlier and always-reopenable for repeat practice.
- Converted Figma designs into pixel-perfect, responsive Flutter UI and collaborated with the team on REST/GraphQL API integration in an agile workflow.
- Also proficient in Rive for building interactive, state-driven vector animations (not yet used in a shipped project).

Larsen and Toubro

Jun 2023 - Jul 2023

Data Analyst Intern

Chennai, India

- Normalized production datasets and presented database-normalization concepts to the team, identifying and correcting existing data errors using MySQL Workbench.

EDUCATION

SRM Institute Of Science and Technology, Chennai

2021 - 2025

B.Tech, Computer Science and Engineering | CGPA: 7.38

Kattankulathur, Tamil Nadu

CERTIFICATIONS

- IBM AI Developer — Coursera
- Introduction to AI — Coursera
- Building AI Powered Chatbots Without Programming — Coursera
- Developing AI Applications with Python and Flask — Coursera
- Python for Data Science, AI Development — AWS
